DETAILED ACTION

1. Applicant's election of Group I, claims 1-9, in Paper No. 8, files on September 25, 2003, is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 10-13 are withdrawn from consideration.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 2 and 4-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Hunt et al (US 2002/0180306).

4. Hunt et al disclose a process of growing a carbon nanostructure comprising the steps of providing a substrate 46 such as silicon, depositing a catalyst dot 52, and growing a carbon nanostructure 44 on the catalyst dot. See figures 4a-4d and paragraph 0056. Thus, Hunt et al disclose all of the steps recited in instant claim 1.

5. As noted, the substrate may be a silicon wafer. The catalyst dots are formed on electrodes 48/50 which are micro-nanometer structures as recited in claim 2.

The carbon nanotubes may be grown using plasma-enhanced chemical vapor deposition as recited in claim 4. See paragraph 0058. The nanotubes are grown in a direction perpendicular to a surface of the substrate and on a flat-tipped surface having an upward-facing catalyst dot as recited in claims 5 and 6. See figure 1.

The carbon nanostructure is a nanotube 44 which would have either a single-wall or multi-wall structure as recited in claim 7.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later

Art Unit: 1742

invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hunt et al

9. Claims 8 and 9 recites that the depositing step and the growing step are automated. To the extent that the steps of Hunt et al art not automated, such automation would have been obvious at the time the invention was made because more efficient operation of the process would have been obtained.

Allowable Subject Matter

10. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art of record does not disclose the specific steps recited in instant claim 3.
